outdoor living

EXPAND YOUR HOME

A new outdoor living space can **add functional square footage** to your existing home by providing a new space to relax, dine and entertain. Consider first how you would like to use the space and then design it as an extension of your interior decorating style.

OUTDOOR ROOMS

Distinct areas for cooking, eating and relaxing can be created, even in a small space, by changing the color or style of paver or by adding a contrasting paver border to define the different spaces. Using pavers to create an area rug can help visually ground furniture groupings. In a larger space, vertical elements like steps, low walls and pillars can be used to create the feeling of rooms.

Match utilitarian spaces with living spaces

Find harmony with the natural surroundings

driveways

CURB APPEAL

A paver driveway is **an investment that adds instant curb appeal** and value to your home. When choosing a paver product it's generally a good idea to complement the main color of your home rather than try to match it. Then, consider borders and accents to draw out specific colors from your home and create continuity. Adding vertical features like pillars, planters and decorative walls further enhances the beauty of your driveway.

PRACTICAL DESIGN

Consider how guests will get from your driveway to your door. If your driveway abuts a wall, slope or garden, add an extra four feet to the width so car doors can be comfortably opened for passengers. Winter brings snow – consider where you'll pile it. And choose a paver that can withstand de-icing salts.

THINK GREEN

Permeable pavers **allow rainwater to flow between the joints** and through special base materials so that it can be absorbed into the subsoil below. This provides a dual "green" benefit; not only does it reduce the amount of water that flows into storm sewers but it also provides moisture to surrounding plant material. **Reduced puddling** on the driveway surface also means that there is **less ice build-up** in winter months.

entrances

WELCOME GUESTS

A great looking front entrance gives guests a warm welcome. Attractive steps that are wide enough to easily navigate, **low garden walls and planter boxes** to frame softscaping, and smartly placed lighting all contribute to a cozy feeling and will help smooth the transition from the street to your home. As a general rule, a walkway should never be less than four feet in width.

A PLACE TO SIT

Even a modest front yard can usually accommodate a small courtyard seating space, where a morning coffee can be enjoyed or parents can observe their children playing with neighborhood friends.

pool decks

SIZE MATTERS

When planning your pool deck **four feet is the minimum perimeter** around the pool for basic access. However, for entertaining or sunbathing, consider a larger size and factor in your outdoor furniture!

SAFETY CONSIDERATIONS

The paver you choose to surround your pool needs special consideration for **bare feet**! Choose a color that **won't absorb too much heat** from the sun. A smoother surface is pleasing to walk on, but make sure it's sufficiently non-slip. For coping around the pool edge: **avoid products with abrasive edges**; use a contrasting color or inset border to help define the edge; and add lighting to illuminate for night swimming and to **define pool edges** and steps for greater safety.

AMPLIFY THE DRAMA

A standard pool shape can become a dramatic focal point by adding vertical elements like **low walls, planter boxes and water features**. Likewise, a hot tub can transform into a dramatic feature by surrounding it with stone for a custom built look.

SEAT WALLS

Outdoor furniture is often over-sized relative to indoor furniture so be sure to design your patio with these generous proportions in mind. For smaller spaces or families who like to entertain, seat walls are a great solution for creating extra places for people to sit without the need for bulky furniture.

EXTEND THE SEASON

Fire features add visual interest and warmth that makes the space more enjoyable to use in cooler weather. Building lighting into low walls, steps and pillars can draw people outside in the evening, and add visual appeal from inside the home.

borders and banding

Like crown molding that is the finishing touch to a room, smartly planned borders and banding can elevate your project from good to great. Unilock® has created borders and banding in pavers and walls and have unique options to make your project stand out.

PREMIUM GARDEN SOIL

Container gardens and raised beds take many forms and require a light-weight, porous soil. Fortunately Gro-Max® provides the right balance in a complete soil blend that will endure. Nearly all the ingredients in Gro-Max® are composted – a process that kills weed seeds but generates a wide spectrum of microbes for soil health. Gro-Max® follows a single recipe and is a consistent product in bulk depots across Ontario.

BEDDING MATERIAL

The right bedding material installed at the right depth is vital to the performance of your pavement. It provides a nice smooth surface for laying pavers and allows water to quickly drain away from the surface.

REMEMBER

A quality project is built upon a solid foundation. For this reason, we recommend hiring a professional contractor.

synthetic grass

DESIGNED TO PERFORM

The rich look of natural grass with our environmentally-friendly synthetic grass and turf products – with no harmful environmental effects.

Designed for the ever-changing Canadian climate, using breakthrough materials and manufacturing processes, our grasses look and feel realistic and beautiful for years.

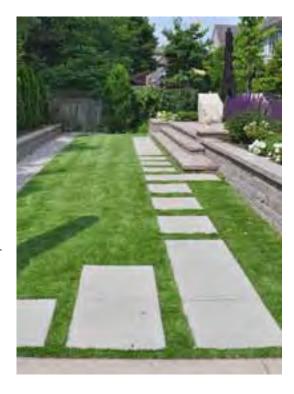

Heat and frost resistant, UV stabilized.

Easy installation, and requires no mowing, watering, chemicals, fertilizing or insecticides – it's great for pets. Frees up your time for the things you enjoy!

For commercial and residential landscapes – synthetic grass always has that fresh cut look, even in the winter. Synthetic products are anti-microbial so there's never a worry about harmful bacteria building up or allergic reactions caused by grass.

Non-flammable, anti-acid yarn resistant to chemicals.

Great for landscaping applications, playgrounds and dog run areas.

rubber mulch and flooring

RUBBER MULCH

So natural looking & colours remain vibrant An innovative, eco-friendly alternative to traditional wood mulch for landscaping and playgrounds. Compared to wood mulch, rubber mulch is safer, more cost-effective, durable, environmentally-friendly and lowermaintenance. Plus, rubber mulch is clean minimizing airborne dust and particles.

MAW ARMOUR RUBBER FLOORING

Durable interlocking tiles are easy to install. Interlocking joint is almost seamless with beveled edges and simple interlock install pattern. Great for fitness facilities, basements, and kennels. Made of recycled SBR rubber and virgin EPDM colour fleck. Available in Black, Platinum, Platinum Blue, Platinum Red, or Earth.

NEW SOFT PAD - SHOCK ABSORPTION / DRAINAGE PAD

Creates safety impact for play areas and playgrounds. IPEMA approved and developed to allow water to drain through to the sub base, reducing the need for aggregate and expensive drainage systems. Can be customized for fall heights up to 12'. 4' x 6' sheets.

2" Soft Pad (6' fall rating)	. \$105.00/ea
1" Soft Pad (4' fall rating)	\$95.00/ea

grass seed

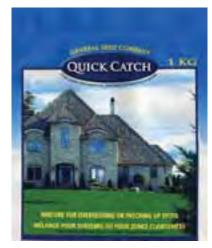

NEW LAWN SEEDING TIPS

- 1) Apply 10 cm of good top soil, minimum
- 2) Apply starter fertilizer at recommended rate
- 3) Apply seed evenly (approx. 5-7 lbs /100 sq.ft.). If using a spreader, apply half horizontally, the other half vertically
- 4) Rake or roll the soil lightly after applying the seed
- 5) Keep the area moist by frequent light watering, until the seed is established
- 6) Depending on conditions, some grass species germinate in a week, others in 4 weeks
- 7) Seed germinates best at 15°-26° C, and takes longer to emerge at cooler temperatures.
- 8) For best results apply in early to mid spring or early fall.

OVERSEEDING TIPS

- 1) Rake bare or thin areas vigorously to loosen soil and remove debris
- 2) For thickening up, apply at half the recommended rate.

stone oven

COOKING IN A STONE OVEN

Cooking in a stone oven is a versatile way to entertain and feed guests, or make rustic, home cooked meals for yourself. The properties of a stone oven floor allow for absorption and even distribution of heat from a wood fire. This means uniform and faster cooking. By manipulating the fire and distance to the flame, it is possible to cook dishes by roasting, grilling and baking. For skilled chefs with stone oven experience, cooking temperature and style can be monitored by eye, but the use of thermometers will aid the average backyard cooking enthusiast.

PRE-HEATING FOR HIGH HEAT

It is important to get your oven up to temperature, use only untreated, dried (kiln dried if possible) wood.

- Chop wood into kindling approximately 3" in diameter and 10" long
- Start the fire with newspaper or a natural fire starter in the centre of the oven, where air can get to it, with the kindling
- As the fire grows feed it more kindling, but if flames reach the mouth of the oven, wait before feeding and do not remove any burning material
 - Let the fire burn for 30 minutes to heat the oven
 - When the oven approaches the desired cooking temperatures, add small and larger logs
 - At 450°C the oven is ready for pizza!

COOKING PIZZA IN A STONE OVEN

Allow the oven to come to an even temperature of 400°C

- Move the fire to one side of the oven where the flames will arch across the top of the oven
- Place the pizza on the oven floor beside the fire and remember to rotate it for even cooking
 - Add wood to the fire as needed to maintain heat (every 15-20 minutes)

TIPS

If you are cooking multiple dishes in a row, or for an extended period of time, rotate the fire between the two sides of the oven to keep the heat distribution in the oven even. High heat cooking is also great for caramelizing and browning dishes as well as cooking appetizers and certain types of bread.

SELF WATERING INSERT FOR PLANTERS

Keeps plants healthy and beautiful – available in 2 square & 2 round sizes that fit most Barkman planters (larger planters simply use 2 inserts connected to a single drain hole).

How it works: Insert A is placed directly on a layer of clean river rock B, lined with landscape fabric C. Cover top and sides with topsoil D. Pour water into filling tube E, to fill water reservoir. Water is wicked up filter columns F (lined with landscape fabric to prevent soil from entering the water reservoir, not shown) providing plants with their main source of water, when needed. Reduces maintenance costs.

CONCRETE PAVING STONE CLEANERS

Grease Release solvent based cleaner. Remove oil, tar, coal tar, latex print, adhesives, rubber and acrylic driveway sealers.

32 oz.....\$18.47/ea.

Rust Remover

32 oz.....\$17.31/ea.

CLEANERS

Oil Off industrial strength degreaser breaks down oil and grease on contact. Biodegradable & garden friendly. Used on paving stones, concrete, asphalt, tires and rims, car engines and barbecues.

1L\$17.31/ea.

Efflorescence Cleaner

Does not contain muriatic acid 2L.\$28.86/ea.

NATURAL STONE ENHANCER SEALER

Polymer based. For natural stone & veneer. Indoor/outdoor. No-sheen, darkens, enriches colour, highlights unsealed stone. Improves the look of weathered stone. Seals and darkens grout. Lasts to 15 years. 946mL.....\$86.99/ea. 3.8L\$242.99/ea.

mortar, paver and joint sands

No dust • haze free • no blower • one watering!
 For paver and natural stone joints up to 4". For overlay & non-overlay application. Helps prevent weeds and damage caused by burrowing insects; and erosion due to wind, rain and freeze/thaw cycles.

Grey or Beige.\$33.48/bag

GATOR DUST POLYMERIC STONE DUST

Residential applications to joints 1/2" to 6": pedestrian applications, patios, walkways, pool surrounds and more; natural stone & wetcast products.

Grey.....\$30.89/bag Beige....\$29.99/bag

DRY SWEEPING JOINT SAND, NON-POLY

Covers 100-150 sq.ft. 50 bags/skid. 30 kg.\$10.73/bag

MASONBOND 400 PREMIUM MORTAR MIX

Specifically for use with cultured brick and stone, granite pavers and slab. A blend of cement material, polymer, masonry sand and other select components. High bond strength. Superior workability. Increased compressive strength and long-term durability. Excellent resistance to de-icing salts. Contains less than 0.1 g/L of volatile organic compounds (VOC), less water (SCAQMD Rule #1168)

30 kg.....\$26.99/bag

TYPE N 116 MORTAR

TYPE S 219 MORTAR

Portland cement and lime mortar. Superior quality.

30 kg.....\$9.99/bag

BRICK & BLOCK ADHESIVE

For installing landscape blocks, steps & retaining walls. Bonds to brick, stone, slate, metal, wood. Minimize movement, help maintain stability. All weather, water resistant, VOC compliant formula.

300mL.....\$9.99/ea. 825mL....\$19.99/ea.

CAULKING GUNS

Heavy duty construction.

9"\$19.99/ea 13"\$24.99/ea

BLACK WATERFALL FOAM

Polyurethane. Nozzle fill joints & gaps between rock to maximize water flow. Fish and plant safe. Quick dry 15-30 min.

16 oz.....\$26.99/ea.

JOINTING MATERIAL

Choose from three types of jointing material with varying durability & cost. We can help explain which is right for your project.

BASIC JOINTING SAND: To reduce the frequency with which you need to replenish, a joint stabilizing sealer is recommended.

POLYMERIC SAND: Uses a binding agent to stay in place longer. It's not right for every project. Install with care to prevent hazing.

UNILOCK® EASYPRO™: The ultimate joint compound for paving stones. No-haze, epoxy resin product is puncture resistant, permeable and eco-friendly (made with 60% renewable products). Perfect for wide joints, but not for all applications.

The best way to prevent weed growth is to keep joints full of a solid jointing compound.

paver accessories, edging

STRONGHOLD™ ALUMINUM **BRICK & PAVER RESTRAINT**

Aluminum edging bends to your needs. Permanent, tight-fitting, for healthy turf growth and maximum lateral deflection. Quickly forms to curves, circles, angles and straight lines. Non-rusting recycled aluminum; completely hidden, one piece does straight or curved pattern; 90° angles without cutting. Will not warp in heat or crack in cold. Easy insert connection system. Can install under pavers (not recommended by ICPI).

8'4" length......\$143.73/ea.

SNAP EDGE® PAVER RESTRAINT

The worlds #1 best selling paver edging. No extra connectors required. 100% recycled rugged injection molded plastic - strongest edging for vehicular & patio/walkway applications. Easy to install with common 8"-12" spikes through patented lap joint connector. One piece system for straight/ curved and complete radius without waste; open base lets grass grow along paver edge; install before or after pavers; only ONE snip to create curves; fewer spikes needed than any other edging, saving time and money.

8 ft.....\$11.78/ea

PROSLIDE™ ALUMINUM CLEAN EDGING

Commercial grade, sliding connection. Versatile, easy to install, NO stake at connection. Durable, lightweight, strong. With heavy-duty 12" stake to anchor in the ground. 1/8" x 4" x 8 ft.

14/box	\$367.09/bx
Singles	
Black, 14/box	\$449.09/bx
Black, singles	

GATOR BASE

Replaces concrete foundations and is engineered to replace 6" of crushed stone. Interlock panels distribute all dynamic loads to a very wide area, practically eliminating any pressure on the ground. Environmentally friendly and engineered to return water to the native soil through evacuation channels incorporated in the gator base. It will never leach chemicals or degrade in the native soil for over 100 years.

.....\$19.71/ea

COMMON STRAIGHT 10" STEEL SPIKES

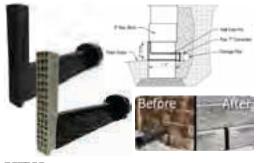

For Snap Edge® edge restraint, Barrier™ landscape edge, landscape timbers, construction projects, securing landscape fabric, fences, decks & more. 50 lb., 3/8" x 10".

50 lb. box (approx. 160 pc.) \$61.61/bx

GATOR SPACER

Uniform spacing - unparalleled horizontal & vertical stability. Bond penetrates the rivet holes, adhering porcelain tile to the Gator Spacer, then hardens to minimize horizontal/vertical tile movement. For 1/8", 3/16" and 1/4" joint widths. Call for pricing

WALL DRAIN PRO

Easy installation. Aesthetically pleasing. Reduces labour costs. Designed for block 8" or smaller. Height can easily be modified for any size block or timber. Male end snaps into 4" drain tile

Kit\$16.04/ea

STRINGALONG™

Make quick adjustments; run several lines. High visibility. Great for hardscaping, surveying, fencing, concrete, masonry. StringAlong™ collar makes raising and lowering string lines quick & easy. Easily visible from a distance, unlike pencil marks, and built to last. Fits any round stake up to 1". Thumb screw sets the height.Gripping teeth hold string lines securely. String can be removed and put back up without losing height.

Single collar and thumbscrew......\$4.29/ea.

fabric, grids, drainage, construction, stone veneer accessories

Air and water can pass through landscape fabric preventing soil loss, reducing weeds and maintaining more even soil temperature.

A permeable separator for shrub & flower beds; around trees; under mulch, rip rap, stone walkways & decks; sub drains, foundation drainage; retaining walls & baskets.

BETTER BARRIERS LANDSCAPE FABRIC

Chemical-free, for permanent landscape applications. Stabilizes soil, controls erosion, separates soil profiles. UV resistant. Years of week control. Gold commercial grade. 3' x 50'.....\$24.19/ea.

LING 120EX GEO NON-WOVEN **DRAINAGE & EROSION CONTROL**

12.6' x 360'	\$0.20/sq.ft.
12.6' x 360'	\$538.99/roll
7.6' x 360'	\$0.20/sq.ft.
7.6' x 360'	\$329.99/roll
4.2' x 360'	\$0.20/sq.ft.
4.2' x 360'	\$186.99/roll

200S WOVEN **GEOTEXTILE**

A light weight slit film woven fabric used where separation and reinforcement are required such as parking lots, yards and driveways. 18mil thick.

6'	\$0.20/sq.f
6' x 252' roll	\$192.49/roll

A geogrid is a mesh-like system integrated into the construction of driveways and retaining walls to reinforce soil & gravel by providing additional support and redistributing the weight of pressure placed on the surface, across a wider area. Geogrids are manufactured using polymers (polyester, polyethylene) known for their tensile strength and durability.

Geogrids are great for uncompacted soil and subsoil layers which are susceptible to sinking / shifting they are also an integral part of construction and improve your driveway's performance & durability.

Geogrids offer additional strength, significantly reducing the need for a thick gravel base, meaning significant labor and material savings. Geogrids prevent vertical and horizontal movement of the gravel layer, ensuring your driveway has a lifespan comparable to your home. The more rigid base withstands the rigors of daily use and heavy loads induced by foot traffic, cars and trailers parked on your driveway for extended periods, and the frequent movement of daily vehicle use.

Geogrids are porous, meaning water can permeate through to the lower layers of subsoil compatible with the use of environmentally friendly permeable driveway pavers, providing easy drainage, reducing surface water runoff and helping to replenish natural groundwater tables. Installation further reduces the amount of excavation needed, making the environmental advantages of integrating a geogrid into your driveway construction, significant.

STRATAGRID 200

Lightweight geogrid for low segmental retaining walls. Ultimate strength 27.4kN/m. Use over soft soil to significantly increase performance of sub-base & base material, increase effective structure strength & potentially decrease aggregate thickness, and over excavation. For paved / unpaved roads, parking lots, and access roads. 6'\$0.80/sq.ft.

6' x 150' roll.....\$940.49/roll

MIRAGRID® 3XT **GEOGRIDS** High molecular weight, high

tenacity polyester multifilament yarns woven in tension and finished with PVC coating. Inert to biological degradation and resistant to naturally encountered chemicals, alkalis and acids.

12' x 150'.....\$1319.99/roll

LANDSCAPE **FABRIC GARDEN PINS**

6" x 1" 1000/bx.....\$80.29/bx Singles\$0.25/ea.

LATH, GALVANIZED METAL

Full sheet, 27" x 96"\$15.28/ea.

CORRUGATED DRAINAGE PIPE WITH FILTER

Roll 4" x 100 ft. / 100mm x 30mm \$107.79/ea. Per linear foot\$2.15/lin.ft

paver, veneer & landscape tools

MEW PLUS BOX

Includes: 60 mm mallet, four different inserts of different hardness, and a free hat. One mallet, every paver, every job.\$120.10/ea

NIN QUICK-E-GAUGE

Accuracy is vital when installing pavers. Checking gravel & sand depth with a ruler often results in variances along an edge. Quick-E-Gauge quickly, easily & perfectly sets the base or setting bed height. Quick-E-Gauge's screeding edge is adjustable for different thicknesses of pavers. Quick-E-Gauge......\$195.30/ea.

NEW SUPERCRAFT **MALLETS DEAD BLOW**

Steel shot filled mallet head. Reduced rebound for absorption of impact energy means powerful impact without vibration (much easier on your joints). Robot-welded, maximum solidity of inserts made from special nylon with excellent impact quality & high durability. Inserts replaceable. 40 mm.....\$70.00/ea.

50 mm......\$99.75/ea.

NIN QUICK-E-SCREEDER PACKAGE

Quick-E-Screeder Package includes the 3', 4.5', and 6' L screeders, plus adjustable, interchangeable handle. Blades are made of durable lightweight aluminum. Easy to use, and much less stressful on your knees and back- no more screed board for your knees! Quick-E-Screeder package\$460.99/pk.

TUFX TUFX **WHEELBARROWS**

Extreme strength for heavy jobs. from..... \$213.90/ea

QUICK-E-SCRIBES

Perfectly transfer cut lines from fixed edge to paver/retaining wall, swiftly. Lightweight, portable, 5-in-1 tool transcribes: marking lines; radius caps on curved walls; irregular natural rock shapes; soldier/sailor rows on fixed surfaces & drop pavers in place; angles for perfect mitered corners (90°,45°,221/2°) Quick-E-Scribe\$215.45/ea.

QUICK-E DUAL ADJUSTER

Ideal tool for adjusting your pavers. Rubber padded hammer on one side, hardened tooth on the other. Quick-E-Dual Adjuster\$270.50/ea

QUICK-E-HAMMER

Designed to rapidly install steel spikes in your Paver edging. Easier on your hands & fingers. Less muscle fatigue, more efficient. Countersink bit design allows a 10" spike to be installed without any bounce (no more loose spikes). Easy to use, with any heavy duty, quality hammer drill that accepts an "SDS MAX" (not included). Quick-E-Hammer\$193.15/ea.

paver, veneer & landscape tools

Modular suction system for the master hardscaper. Power Pack with 2 batteries + 1 hr Quick Charger......\$5975.00/ea.

(Shown with Power Pack above) ES Housing unit......\$815.00/ea. ES Pad 18"x36".....\$1280.00/ea. ES 25' Hose\$83.40/ea.

Maw PM Stone Lifting Suction System

1 or 2 person PAVE MOR units plus the versatile & popular PM 3AIR.
2 people and a compressor lift up to 240 lbs (109 kgs). 1 person PM 1AIR
unit lifts pavers/slabs up to 70 lbs (32 kgs). Models are stainless steel with durable silicone suction seal or foam head. 1-Year limited warranty.
PM 3AIR \$\text{\$2410.00/ea}\$

QUICK-E-ERGO XL

Pick up multiple size slabs. Self-locking latch. Built-in height adjuster to accommodate different slab heights. Can use with Quick-E-Ergo Assist or an excavator (sold separately). Helps alleviate back and hand strain. Adjust easily from 17" - 43". Holds up to 480lbs.

Quick-E-Large Slab.....\$1280.00/ea

The ultimate tool for picking step treads, slabs and wall material. Can pick product from front-to-back, or up to 4' end-to-end. Clamp adjusts from 9" - 48" and holds up to 1800 lbs.

paver, veneer & landscape tools

PRO-SAFE LIFT SYSTEM

Heavy lifting apparatus. Safely turns any forked machine into a pallet crane in seconds! Lift up to 3500 lbs. 65 gauge industrial grade. Puncture & tear resistant. Highly stretchable plastic film. Pro-Safe Lift System.....\$1601.75/ea.

NEW CF3 PRO COMPACTOR

Premium operating comfort. Quick, efficient, can be turned off on the guidebar.

- 4,500 lbs. centrifugal force.
- 1,800 lbs. centrifugal force.
- 218 lb. machine.
- Base plate width: 20".
- Engine: Honda GX 160.
- Wheel kit and water tank optional
- One-piece cast eccentric housing & base plate

\$3470.75/ea. CF 3 Pro

GRADE-RAKE

capacity # for max. weight.

Red hook ... \$1345.00/ea.

MEM RED HOOK **ATTACHMENT** 4000* lb capacity. *Limited by the equipment/clamp in use. Always use the lesser

36" wide. Lightweight, durable, extruded aluminum alloy. Easy to clean. Powder coated handle. Double-sided blade with serrated edge. Red hook\$130.50/ea.

Tree Buddy 3000\$680.00/ea.

NEW BOULDER **BUDDY 4000**

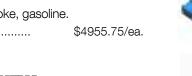

Use with any machine. 4000 lb. capacity, limited by machine's lift capacity (whichever is less). 13'8" x 2"W ballistic nylon covered strap. Boulder Buddy 4000.....\$594.00/ea.

VPR 450 PAVER ROLLER

Rolls gently over material preventing slabs/paving stones from shifting/cracking/breaking on the corners and edges. Sensitive concrete slabs with relatively low thickness can be gently vibrated and pressed into their bedding.

- 238 lb. machine.
- Base plate width: 16.5".
- Engine: Honda GX 160, 4-stroke, gasoline.

VPR 450

CR 7 COMPACTOR

Superior impact power with a flexible width. The CR 7 for use in road construction and civil engineering.

- 14,625 lbs. centrifugal force
- 946-1075 lb.
- Base plate: 38" x 26"
- Engine: Hatz 1 B 40 electric start diesel or Honda GX 390 gasoline.
- COMPATROL® 2.0 optional for Hatz engine only.

\$14190.00/ea. CR 7.....

The best in the industry and rammer of choice for rental. With a lower center of gravity, this machine demonstrates superior handling and climbing ability.

- 148 lbs.
- Base plate width: 11"
- Engine: Honda GX 100 four-stroke
- Multi-stage air filtration system
- Variable 3-speed control lever

SRV 620 \$4310.75/ea.

terms and conditions

Return & Refund Policy

- A copy of the original invoice must be provided at time of return at the purchasers' responsibility.
- Any refund will be issued in the same manner of payment as it was originally made.
- Approved returns must be within 30 days of invoice date.
- Cheques must clear 10 days before cash refund.

! Items APPROVED for return

(restocking fee applicable):

- Undamaged, unopened, uncut merchandise in original package. We may accept partial / opened pallets at the managers' discretion.
- "Stocked" product is returnable with a 10% restocking fee ("stocked" refers to items carried & stocked at Stone Landscapes Inc., indicated by bin location on our receipts under the product code).
- Some "Non-stock" product is returnable with a 25% restocking fee. ("non-stock" refers to items not stocked by Stone Landscapes Inc.)

Note: Responsibility for return rests with the buyer. Any request for Stone Landscapes Inc. to pick up authorized return material is subject to delivery charge (see delivery fee chart). Pick-ups done at the convenience of Stone Landscapes Inc.

Note: Any product picked up by our drivers (via a purchased return pick-up), must be wrapped properly, per MTO standards, on skids, before the driver arrives.

! Items NOT returnable:

- All Natural Stone
- Any Soil, Mulch or Aggregate
- Any interlock paver or wall stone under minimum packaging (ie.: less then a section)
- Vendor "Custom/ Special" Orders
- Clearance items
- Special buys for flyer/sales events

Skid/ Crate & Yard Bag Refund Policy

- Pallets, crates & yard bags must be returned in good condition for credit. (ie. no return accepted on broken skid runners, stretchers or missing boards)
- Pallets, crates & yard bags must have been purchased from Stone Landscapes Inc.
- Pallets, crates & yard bags returned will only be credited to the amount purchased.
- The purchaser is responsible for returning goods. All pallets and crates picked up for return are charged a delivery fee (see delivery fee chart).
- A copy of the original invoice must be provided for return at the purchasers' responsibility. Skids must be returned by May 31st of the following calendar year.
- Deposits apply to: skids = \$20.00/ea.,
- Crates = \$30./ea, Portable Yard Bags = \$10./ea.
- Permacon skids = $$25.^{\circ\circ}$ /ea. purchase & $$20.^{\circ\circ}$ /ea. return (\$5/skid non-refundable)

Custom/Special Orders

If you don't see what you're looking for in our catalogue call us, we'll do our best to get it for you. **Note:** All custom or special orders must be paid in full, prior to the order being placed. Custom orders are non-returnable (see "Return & Refund Policy").

Warranty Policy

All packaged products are backed by manufacturer warranties. Please contact us for more information.

Pricing Policy

 Prices are subject to change without notice: we endeavor to offer the most competitive prices.

Estimate Policy

- Official Stone Landscapes Inc. quotes valid for 30 days only; verbal quotes not valid.
- When our staff assists in estimates, it is to the best of our ability without a site visit.
 We use measurements provided by you and take no responsibility for estimations.
 We encourage you to check all numbers before ordering.

Catalogue Content & Additional Policies

Catalogue prices are based on manufacturer charges & are subject to change after print. We work hard to hold price increases and continually shop and compare competitors' prices. We pass along manufacturer price decreases as they occur. Although we make every effort to ensure accuracy, all prices, copy and specs are subject to error. We reserve the right to correct these errors. Certain products can become limited due to seasonal availability. Colours may vary from shipment to shipment and between seasons. Please ensure you have all the material you need for your project to ensure a consistent outcome.

Credit Policies

(approved commercial accounts only)

- All commercial customers seeking a line of credit must complete a credit application and be approved through a credit check.
- All credit customers must keep their account in good standing, according to our terms of Net 30 days from invoice date.
- A 6% interest charge per month is applied to all outstanding invoices over 60
 days from the date of invoice. This charge then becomes part of the total amount
 due. On any consecutive months, or part months thereof, where payment is still
 overdue, 6% interest is added to the total amount outstanding which includes
 any previous interest charges.
- All commercial accounts are monitored. Any account that abuses payment terms will go on credit hold and further charging privileges may be revoked.
- There is a \$50.00 charge for each cheque that is returned by the bank, for any reason

Pickup Processes & Guidelines

- Picking up your own products can save time and money, but you may need multiple trips due to weight, size and vehicle capacity.
- Vehicles must be loadable by our loader, from the top. We won't load closed top
 vans through back doors or pick up trucks with lids that open less than 90° from
 the bed. If your vehicle is not in a condition suitable for carrying the material, we
 may not load you. No loose bulk material such as mulch, soil or aggregate can be
 loaded into a personal vehicle.
- Check the pressure and load rating of your tires. Close all gaps so material (esp. rock) can't fall out of your truck or trailer while driving. The safety of others on the road is extremely important to us.

Loading

- For small projects or amounts less than a yard, we carry bagged products, easily loaded into vehicles, clean and easy to transport. Due to safety, we cannot permit customers to shovel product into bags, trunks, vans or any other vehicle at our facility.
- Very capable employees perform our loading. All loading personnel undergo a
 training program and demonstrate knowledge and skills in all facets of front end
 loader operation and safety before they can load. If you are worried about your
 vehicle, we suggest you bring protective padding (tarp or blanket) for the side of
 your truck. We load at your risk, if you are concerned, we offer delivery.

Photo Policy

Photos used in our literature, e-mail, or website are the property of Stone Landscapes Inc. or affiliates and cannot be used without our written consent. We have legally purchased or obtained rights to these images. Our intent is to inspire and aid in selection. Image colour and quality may not be accurate due to limitations in the camera, screen image or print. Environmental factors (harsh sunlight / overcast sky) also impact true colour rendition. We highly recommended viewing our inventory & displays before finalizing your selection.

terms and conditions

Delivery Policies

Delivery Charges* 25 kms or less	
Split Load Dump Truck* (up to 5-10 yards**)	\$80.00/ea
Tri-Axle Dump Truck* (up to 18-25 yards**)	\$100.00/ea
Small Flatbed Truck* (up to 12 skids**)	\$140.00/ea
Tractor Trailer* (up to 24 skids**)	\$140.00/ea
25+ kms***: all trucks will be quoted	
Excessive Delay Charge* (30 min+)	\$100. ⁰⁰ /hr
Forklift Product Placement*	\$140. ⁰⁰ /hr
Dump Truck Rental* (our driver only)	\$110. ⁰⁰ /hr
Flatbed Truck Rental* (our driver only)	\$165 .00/hr

Important Note on Charges: Due to volatile gas prices, delivery charges may change. Please call for up-to-date fees & full details.

- * See delivery map and delivery policies for details
- ** Capacity varies due to material
- *** Must be approved by customer service delivery times may vary

Local delivery is within 25 km of Waterloo. Deliveries over 25 km are scheduled as-available. Call for a quote.

Delivery Fee

- Payment required prior to delivery through head office or retail no COD's.
 Applicable taxes are extra.
- Split loads are determined by weight, not volume. If we can combine deliveries we'll suggest it to save you money.
- Our delivery fees are subject to change due to the volatility of fuel prices and are non negotiable.
- For excessive delays (30+ mins) or placement change requiring additional delivery time, you are billed at \$100/hr.
- Stone Landscapes has scales to determine product weight so you only pay for what you receive!
- We take telephone orders during business hours, but recommend viewing product in-store before ordering.

- In-stock items deliver within 3 business days from date of sale (non-stock items may take longer). We schedule orders first-come-first-serve. We cannot commit to exact times, but can indicate AM or PM delivery. Unforeseen events could alter scheduling. We make every effort to meet time commitments.
- We perform deliveries daily. Orders are often scheduled weeks ahead, particularly prime time Fri./Sat. day/time periods.
- We send the truck size that works best for scheduling, unless specified. Larger trucks than needed may deliver, but charge is based on distance & minimum truck size required. Delivery fee will not increase due to a size upgrade made for scheduling purposes.
- We do not dump in multiple locations (distributing around property).

Delivery Restrictions & Truck Limitations

- We deliver on customer's property only. We will not place product on public/city property, or drive/trespass on property that is not yours.
- We take great care on deliveries, but enter your property at your request & risk, and
 are not responsible for any damage to driveways, sidewalks, overhanging trees or any
 obstacles. Check the load drop area for overhead wires, low tree limbs, etc. Consider
 height & turnaround clearance required by our trucks to dump. Our drivers have final
 say on delivery placement.
- You don't need to be present for delivery. Provide us instructions, clearly mark the load drop area & we'll do our best to meet your wishes. We are not responsible for delivery in the wrong area if improperly marked or if the driver judges he cannot accommodate the request.
- Wet weather makes the ground very soft please provide an alternate drop area.
 Surface must be stable and relatively level. Steep driveways or hills (8° to 10°) may be problematic.
- New pavement may need 1 year to cure. If your driveway is damaged, has a rut or weak spot, a dump truck can worsen it.
- Any load needing redelivery based on the purchaser is subject to an additional delivery fee.
